Message From The Founder

We are extremely delighted to introduce our company **KV IT-Solutions Pvt. Ltd.** is on a fascinating path of growth and development, from its humble origin in 1995 and registered as a Pvt Ltd Company in 2007, **KV IT-Solutions Pvt. Ltd.** has emerged to a highly versatile service provider of Linux Based Solutions i.e. started with a mission to serve the clients with zero cost opensource solutions, a comprehensive suite of web, software related services and Outsourcing of Manpower, Infrastructure Management with a performance driven approach. Thanks to our capability to acclimatize with cutting edge technologies while keeping the unique needs of our esteemed clients at the forefront of the company's focus.

Progress for me has never been a dream. It has always been a distant reality and once one milestone is achieved, there is always another one waiting to be crossed. Like entrepreneurs who stick to their dream, I always wanted to push my company to more prosperous milestones. I always perceived my company as a unit that could make a difference with its quality and competitively priced products & services.

Without a doubt we have the people and the resources to lead this company to a bright future. We have reached, thus, far owing to the hard work, dedication and determination of the team that drives this organization. We have earned trust and respect from the giants of the industry, and I'm confident that we will grow from strength to strength in our endeavor to make this company into one that delivers value and satisfaction to our ever growing list of valued clients.

Our biggest assets have always been our small but highly trained team of professional managers and engineers who are backed by a very able team of administrators. We have a clear vision about building on our strengths and our achievements while holding dear to us our basic principles. The journey of the company is never ending. But with the support of my team and clients,

Thank you all, on behalf of the **KVIT** team.

"We are born Free, No Gates or Windows can snatch our Freedom"

Vikas Debnath
Founder Director
KV IT-Solutions Pvt. Ltd.

About Company

KV IT-Solutions Pvt. Ltd. (KVITSPL) is a Delhi (India) based company providing complete Information Technology solutions. We with our experience and expertise are focused to provide the best one stop solutions for all your IT needs, whether it is Infrastructure Management, Software Development, Enterprise Solutions or Web based Solutions, we provide all. **KVITSPL** is driven by customer oriented approach with focus on operational excellence and providing tailor-made solutions .We continually redefine quality and commit to deliver the best to our clients not only meet but exceed their expectations. **KVITSPL** is the leading service provider to all IT Solutions with expertise in the following domains:

- ▶ **Infrastructure Management Services. (AMC, Networking, Infrastructure Creation etc...)**

- ▶ **Industrial Training on LINUX, AWS, DevOPS, Python etc..**

Today we have achieved this position in a short span of time meeting the expectations of the corporate world.

Vision:

The visionary goals are the lofty objectives that the management decides to pursue. These visionary goals are longer term and more challenging than strategic or tactical goals. There may be slight chance of realizing the vision, but the firm believes that it can do so. Kvit's visionary goals include to be one of the best IT Solution Provider and to help people to Get rid of Microsoft's monopoly by providing Opensource solutions wherever feasible.

Mission

Our mission is simple: make technology an asset for your business not a problem. We are concentrated at minimizing the wastage of customer's valuable time by suggesting consulting the best available solution at reasonable price. We always emphasize on developing innovating solutions and learning new technologies. We can implement the most advanced computer technologies as well as develop new ones. In brief our mission is to provide excellent customer service, initiate new developed technologies with creativity and integrity.

Our History: Service with smile since 30 years

Infrastructure Management

Thinking of business development or running an organised business is not possible without Information Technology now a days. Computer / EMAIL/Internet are integral part of business today. If Your organisation does not have an IT Dept. or if your IT Dept. doesn't have all capabilities to meet your expectation from IT Infrastructure, IT Outsourcing is the best option available for you.

The Benefits of Outsourcing

Companies of all sizes struggle with escalating costs of full-time employees. Hidden behind paychecks are less visible costs. Not often considered in the decision to outsource include hiring, training, administration, benefits, absenteeism, workspace and equipment. By some estimates, employee expenses account for up to 70% of a company's overall revenue. In addition to providing sizable financial advantages, outsourcing's other advantages are:

1. Expertise:

Harness the talent, technology and expertise of niche providers and leverage best practices. Expert sources that might carry too large a price tag to employ full-time, can fit into nearly any budget on a project-by-project or as needed basis.

2. Management:

Focus on the core aspects of your business and leave the worries of non-core activities to someone else without having to commit additional managers or your time to manage a project. Outsourcing companies have their own management worries of non-core activities to someone else without having to commit additional managers or your time to manage a project. Outsourcing companies have their own management

3. Personnel Flexibility:

Hire specialists without being obligated to keep them on when they are not needed. It is easier to terminate an outsourced relationship than to layoff full-time personnel.

OUR STRENGTH

Quality Assurance

24*7 Online Support

Instant Response

6 Working Hours
Downtime Maximum

Skilled Team

Tried, Tasted and a
Trusted Name

Satisfied Clientele

Resident Engineer
Hardware Backups /
Standbys

4. Capital Conservation:

Concentrate financial resources on core business activities vs. investing capital in overhead, such as: office space, computers, etc.

5. Time Savings:

Don't reinvent the wheel. Someone, somewhere has done it before or developed an easy solution – why not use it?
